

## Special Issue

# Recent Advances in Food Flavor and Sensory Attributes Analysis

### Message from the Guest Editors

Flavor fingerprint plays a key role in determining the acceptability of foods and beverages by the consumer. This is currently of great interest in the scientific food sector. The evaluation, in terms of the quantification, chemical identification, and sensory properties of raw materials and finished products, is, in fact, often at the center of research projects in the food sector. Instrumental analysis coupled with sensory analysis, as well as characterizing the food, allows for evaluating the impact of different processing technologies and the use of a new ingredient, etc. Results obtained from this kind of research are widely applied in many fields including quality control, food marketing, food inspection, and traceability. Scientific articles published in the field of flavor science and sensory evaluation have contributed greatly to the development and growth of food science and technology worldwide. This Special Issue is intended to collect high-quality manuscripts on research related to instrumental flavor analysis and sensory evaluation for the characterization of food matrices.

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

---

### Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
