Qualitative Analysis of Food Products

Message from the Guest Editor

Qualitative control and analysis of food products is a requirement for food industries. Food analysis is requesting the development of more robust, efficient, sensitive, and cost-effective analytical methodologies. Fundamental and state-of-the-art methods of the development, optimization, and practical implementation in laboratories, and validation of these methods for the food monitoring are employed. Methodologies for food microbial contaminants, food chemistry and toxicology, food quality, food authenticity and traceability are important to be presented and discussed. The application of “omics” in food analysis (such as metabolomics), and a general overview on the new discipline of Foodomics can be discussed. Statistical analyses are also a tool for the qualitative analysis of food, which, in conjunction with other tools, such as chemometrics, can aid in the direction of food safety. Prof. Dr. Theo H Varzakas
Assoc. Prof. Charalampos Proestos

Guest Editor

Prof. Dr. Theodoros Varzakas

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
