

Special Issue

Foods Quality Assessed by Chemometrics

Message from the Guest Editors

Food industry stakeholders are challenged to promote food quality meeting prerequisites encompassing sustainable and eco-green processing, increased shelf-life without safety, sensory satisfaction and nutritional value compromises. In addition, food fraud related to deliberate product mislabelling or economically intended adulteration, is of major concern for both industry and regulatory authorities due to cost and public health implications. In this context, chemometrics tools, such as optimisation designs, supervised and unsupervised exploratory analyses and multivariate regression modelling, are commonly implemented as part of food quality assessment. In this Special Issue, we aim at publishing innovative papers on: Food authenticity and adulteration case studies, foodomics, mathematical modelling and optimisation of food industry relevant unit operations including bioprocessing and food waste valorisation, optimisation of food composition, nutritional value, storage stability and consumers' acceptability, and prediction of food shelf-life, adopting chemometrics assisted instrumental and sensory data analysis approaches.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
