

Special Issue

Functional Foods with Modulating Action on Metabolic Risk Factors

Message from the Guest Editors

Health-related metabolic risk factors, such as increased blood pressure, obesity, and dyslipidemias, can lead to metabolic syndrome and enhanced risk of cardiovascular disease, stroke, and death. In recent years, there has been increasing evidence that functional foods, food components, and bioactive molecules from the plant and microbial origins can exert preventive and therapeutic benefits for human health by modulating the host metabolism, physiology, nutrition, and immune functions. For this Special Issue of *Foods*, we are inviting the submission of manuscripts that join efforts to present and compile the effects of traditional and emerging functional foods and food components on the metabolic risk factors in a translational perspective by combining in vitro, ex vivo, and animal studies, and or clinical trials/approaches. Original and unpublished research and highest-quality review papers addressing the physiology, cellular, genomics, and molecular mechanisms underlying the modulating action of functional foods and food components on inflammation, blood pressure, oxidative stress, and immune and endocrine signaling pathways are encouraged.

Guest Editors

Prof. Dr. Evandro Leite de Souza

Department of Nutrition, Federal University of Paraíba, João Pessoa

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
