

Special Issue

Smart Food Cold Chain Techniques and Traceability System

Message from the Guest Editors

Cold chain logistics has become an important measure to maintain the quality of postharvest/postmortem agro-food, reduce food loss and ensure food safety. Agro-food cold chain logistics is a systematic engineering process, involving various technologies, such as low-temperature control, postharvest physiology, preservation technology, information management, etc.; covering diverse categories of F&V, meat, milk, aquatic products, etc.; including different links, such as pre-cooling, storage, transportation, and sales, etc. With the rapid growth of new-generation information technologies, represented by big data, artificial intelligence and the Internet of Things, etc., informatization and intelligence of agro-food cold chain logistics has become an important future trend. Meanwhile, the application of smart food cold chain techniques is promoting the upgrade of food traceability systems in granularity and credibility. In order to publicize and report the relevant advanced research achievements, the magazine plans to launch the Special Issue "Smart Food Cold Chain Techniques and Traceability System", and is soliciting contributions for the topic.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
