Innovations in Grain Storage and Processing: Strategies for Reducing Losses and Enhancing Food Product Quality

Message from the Guest Editors

As we face the urgent challenge of global food security, the importance of grains as a basic food source is clearer than ever. However, from the field to our tables, we lose too much of this precious resource. This is why we are launching a Special Issue titled "*Innovations in Grain Storage and Processing: Strategies for Reducing Losses and Enhancing Food Product Quality*." Our goal is to gather the latest research that can help us maintain grain safety and improve the quality of our food. We invite you to share your groundbreaking work on the following topics:

- Improving Grain Storage: We are looking for new ways to store grains that cut losses and keep them in top condition for longer.
- Advancing Grain Processing: If you have innovative methods that make grain processing more efficient and produce higher-quality food, we want to hear about them.
- Creating New Grain-Based Foods: We are interested in research that leads to new, nutritious, and appealing grain-based foods.

We believe that your contributions can make a significant difference in addressing food security and improving grain quality.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
