# Food-Derived Bioactive Peptides: Current Trends and Future Perspectives

### Message from the Guest Editors

Food-derived bioactive peptides have gained significant attention in recent years due to their potential health benefits. These peptides can be from various food sources. They have been found to possess diverse biological activities. Current trends in research focus on the identification, isolation, and characterization of bioactive peptides from different food sources.

Researchers employ techniques such as enzymatic hydrolysis, protein purification, and mass spectrometry to identify and isolate specific peptides with desired properties. Additionally, advanced technologies like proteomics and genomics are being utilized to understand the mechanisms of action and to determine the bioavailability of these peptides in the human body. At present, the further research trends of food-derived bioactive peptides include the identification of novel source bioavailability and delivery systems, mechanisms of action, investigation of precise mechanisms, health benefits and disease prevention, as well as assessing the specific health benefits of bioactive peptides, gut microbiota interactions, safety, and regulatory considerations.

---

### Guest Editors

Dr. Shuzhen Cheng

SKL of Marine Food Processing & Safety Control, National Engineering Research Center of Seafood, School of Food Science and Technology, Dalian Polytechnic University, Dalian 116034, China

Dr. Fengjiao Fan

College of Food Science and Engineering, Nanjing University of Finance and Economics, Nanjing 210023, China

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

### Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2026).
