

Special Issue

Insects as an Innovative Source for Food Production

Message from the Guest Editors

The consumer trend in choosing nutritionally high-quality foods with enhanced nutritional traits is constantly increasing, thus driving the food industry towards the selection of innovative and sustainable raw materials. Because of their positive nutritional characteristics and low environmental impact, edible insects might be considered a 'food of the future'. In this context, researchers and food business operators have recently started to explore the exploitation of edible insects for production of nutritionally high-quality foods rich in protein, vitamins, amino acids, and minerals. Though some pioneer studies have explored the use of edible insects for manufacturing of novel foods, including minced meat-like and cereal-based products, further research is needed to evaluate the effects of these alternative poorly explored ingredients on the technological, nutritional, microbiological, and sensory properties of foods. This Special Issue is therefore open to all contributions aimed at exploring the use of edible insects as sustainable sources for production of food ingredients and ready-to-eat foods with enhanced nutritional traits.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
