# Current Research of Lactic Acid Bacteria in Fermented Foods

### Message from the Guest Editors

Lactic acid bacteria are one of the most industrially important groups of bacteria and have a very long history of use fermentation. These organisms are used in a variety of ways, including food preservation health improvement and production of macromolecules, enzymes and active molecules of great importance and application in food technology. They have been used worldwide in the generation of safe, storable, organoleptically pleasant foodstuffs for countries. Domestication of LAB strains passed down through various culinary traditions and continuous passage on foodstuffs has resulted in modern-day cultures being able to carry out these fermentations. Today LAB play a prominent role in the world food supply, performing the main bioconservations in fermented dairy products, meats, and vegetables. Given their importance and the vast array of applications in the food area, research on genetics, metabolisms, and applications of these bacteria has made considerable progress over the last decades. However, a wide range of potential applications of LAB in food microbiology, biotechnology and the field in human health have yet to be identified.

### Guest Editors

Prof. Dr. Adam Wasko

Department of Biotechnology, Microbiology and Human Nutrition,  
Faculty of Food Science and Biotechnology, University of Life Sciences  
in Lublin, Lublin, Poland

Dr. Katarzyna Skrzypczak

Department of Plant Food Technology and Gastronomy, Faculty of Food  
Science and Biotechnology, University of Life Sciences in Lublin, Lublin,  
Poland

### Deadline for manuscript submissions

closed (10 January 2023)

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

---

### Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
