New Strategies to Enhance the Digestibility of Meat- and Seafood-Based Foods

Message from the Guest Editors

Meat- and seafood-based foods are important supplies of proteins for our diet. Unlike other nutrients, proteins are interesting in a sense that they may refold and reaggregate into a different structure during processing and digestion, and this may have an impact on their overall digestibility. Through advancement in processing technology, attempts have been made to increase the digestibility and bioavailability of protein-rich food products that are of meat and seafood origin. In this Special Issue, we are encouraging the submission of manuscripts related to digestibility of protein-rich foods with a focus on meat and seafood. The use of novel processing technology to enhance digestibility, modeling or examination of protein breakdown during digestion, bioavailability of amino acids and peptides during digestion, and development of in vitro digestion models or tools specialized for studying protein digestibility are topics of interest. Through this Special Issue, we aim to advance the understanding of digestibility in protein-rich foods.

Guest Editors

Prof. Dr. Sun Jin Hur

Department of Animal Science and Technology, Chung-Ang University, Anseong 17546, Korea

Dr. Michelle J. Y. Yoo

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
