

Special Issue

Nutrients and Functional Properties of Crops

Message from the Guest Editors

Worldwide, oilseed consumption has been increasing at a rate faster than that of other agricultural products, primarily due to the replacement of animal oils with vegetable oils. Oilseeds are considered important food crops due to their unique chemical properties and supply of nutritional and functional components. Oilseeds and their crude oils contain balanced fatty acids and antioxidants that are protective against harmful substances, especially free radicals. This Special Issue aims to present a collection of studies focused on the nutritional value, functional properties, and industrial applicability of oilseeds. Topics of interest include the identification of physical and chemical properties through the search for useful functional substances derived from oilseed crops. We welcome the submission of theoretical and experimental research papers as well as original research papers and review papers.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
