

Special Issue

PCR in Food Science: Current Technology and Applications

Message from the Guest Editor

Food science and food safety are of great significance to people's life stability and social economy. It is very important to use the corresponding detection technology in the research and development, production, processing and circulation of food. As a new molecular biology technology, PCR has been widely used in food safety detection because of its rapid, sensitive and simple operation.

In this Special Issue, we are encouraging submissions of review or research manuscripts related to the new PCR techniques and applications in the areas of food science and food safety such as foodborne pathogen tests, food allergen tests, food authenticity tests, food mycotoxin tests and transgenic food product tests. We are highly interested in and encourage manuscripts related to the new modified PCR techniques coupled with biosensors, new functional nucleases, etc., for food safety.

Guest Editor

Prof. Dr. Litao Yang

Joint International Research Laboratory, Metabolic and Developmental Sciences, School of Life Sciences and Biotechnology, Shanghai Jiao Tong University, Shanghai 200240, China

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
