Detection and Control of Foodborne Pathogens in Food Supply Chain

Message from the Guest Editor

I invite you to publish the results of your research in this Special Issue entitled “Detection and Control of Foodborne Pathogens in Food Supply Chain”. Every day, we are engaged in fundamental activities to develop rapid and effective laboratory methods that can identify and enumerate pathogenic microorganisms in food. Furthermore, our work aims to validate methods capable of characterizing and comparing strains of pathogenic microorganisms to resolve food poisoning outbreaks and map the persistence of microorganisms dangerous to the health of the consumer along the agri-food chain. The publication of such studies on the detection and characterization of pathogenic microorganisms can lead to the sharing of laboratory methods with excellent performance and the availability of data that safety competent authorities can use to facilitate plans for consumer health protection.

Guest Editor

Dr. Daniela Manila Bianchi

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
