Waste Reduction and Management in Food Security and Food Sustainability

Message from the Guest Editor

Around 700 million people suffer with food poverty, while plenty of food is wasted or lost every year. Food loss and wastage occur from farms to households, which could be due to poor handling, improper transport or storage, extreme weather conditions, cosmetic standards, etc. Researchers across the globe aim to find the best ways to prevent food loss and waste to provide enough food for all, while reducing the pressure on the environment (lesser land and water usage) and decreasing greenhouse gas emission levels. Therefore, communicating the research output that addresses food security and sustainability challenges throughout the value chain is vital. In addition, this information pertains not only to food loss/waste (food security and sustainability challenges); it must address the ways that food is being wasted in households and how to change the consumers' behaviour to prevent food wastage.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
