Food Quality and Nutrition: Improving Consumer Behaviour

Message from the Guest Editor

Food quality is the most important determinant for the choices of consumers. Food safety and food identity are of course implicit quality values. However, food quality extends to the sensory properties of the food, the nutritional value, the packaging and labelling, the presentation, the availability, etc. In particular, nutritional value has become a major determinant for consumer choices since the advent of the 21st century. Not only did the nutritional information on the packaging become mandatory, but several schemes for the front of pack labelling to signify the “healthiness” of each food product emerged. Is food quality and nutrition affecting the consumer behaviour regarding their food choices or even their choices on food markets and food services? What is the information conveyed to the consumers regarding food quality and nutrition on the food packaging and presentation? Is there a legislative framework and law enforcement to protect the consumers from misleading information? The aim of this Special Issue is to address all the aspects of food quality and nutrition that may affect the consumer behaviour.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
