Food Safety Management: Contaminants and Toxicants

Message from the Guest Editors

With the rapid development of industry and agriculture, environmental issues have come to rank amongst the great challenges faced by human beings. On the one hand, contaminants and toxicants are ingested by humans through water, food, and air, and damage various tissues and organs of the body. On the other hand, they can also accumulate in the human body through the food chain, further aggravating harm to humans. Therefore, in-depth exploration of the metabolic process of contaminants and toxicants, elucidation of the toxicity mechanism of contaminants and toxicants, and the search for effective therapeutic targets and therapeutic drugs are of great practical significance for the protection of food safety. Ultimately, the objective in undertaking these endeavours is to prevent and treat damage caused by contaminants and toxicants in food. Researchers are invited to submit their up-to-date original research articles, review works, and short communications to this *Foods* Special Issue, entitled “Food Safety Management: Contaminants and Toxicants”.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
