

## Special Issue

# Recent Advances in Reusable, Recyclable, or Compostable Food Packages

### Message from the Guest Editors

Packaging is an essential mean for preserving food. It serves important functions of containing the food; protecting against damage, contamination, and deterioration; and delivery of manufacturer–consumer communication. However, extensive use of plastic packaging pollutes the environment, and undermine consumer trust in the sustainability of the food supply chain. To address this issue, the New Plastics Economy Global Commitment endorses a new circular economy vision in which by 2025 all plastic packaging will be reusable, recyclable, or compostable. The aim of this Special Issue is to present recent advances in the development and implementation of reusable, recyclable, or compostable food packaging. This Special Issue of *Foods* is a partner of the European COST Action 19124 - RETHINKING PACKAGING FOR CIRCULAR AND SUSTAINABLE FOOD SUPPLY CHAINS OF THE FUTURE (CIRCUL-A-BILITY). This action is a pan-European network of actors involved in all aspects of food packaging, including over 200 members from 44 countries, in aim to harmonize, integrate and support implementation of sustainable food packaging solutions while reducing food waste.

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1  
(Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.5 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).
