

## Special Issue

# Functional and Bioactive Nutraceutical Compounds from Seafood and Seafood By-Products

### Message from the Guest Editors

Our Special Issue “Functional and Bioactive Nutraceutical Compounds from Seafood and Seafood By-Products” welcomes the submission of reviews and manuscripts describing original research aimed at improving the valorization of seafood and their by-products. We are highly interested in and encourage manuscripts related to the chemistry and quality of seafood. Marine organisms constitute almost 80% of the world biota and provide a valuable resource for human nutrition and health. Their nutritional value is attributed to precious biomolecules such as polyunsaturated fatty acids, proteins, peptides, polysaccharides, polyphenols, probiotics, enzymes, vitamins, and minerals. The high seafood biodiversity and chemical diversity represent an unlimited resource for the development of new bioactive products. In this context, particular attention must be paid to marine by-products, also aiming at a more environmentally sustainable use of marine resources and higher economic benefits for the sector. Seafood by-products contain valuable biomolecules, whose knowledge is necessary to fully appreciate and make use of what is now considered waste.

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

---

### Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
