Sensory Evaluation and Quality Control of Wine

Message from the Guest Editors

Original research papers and review articles are welcome for inclusion in this Special Issue on wine, which will focus on the application of sensory analysis, also combined with chemistry, for the investigation of: new sensory-active compounds; grape and wine characterization; field, cellar, and storage variables affecting wine quality, including microbiological aspects; impact of sensory, physical-chemical, and chemical interactions/reactions among wine components; effects of consumption modalities; and intrinsic and extrinsic factors affecting perception, acceptance and preference.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.
