

Special Issue

Residue Detection and Safety Control of Food Chemical Contaminants

Message from the Guest Editor

Food safety is a globally significant public health issue. Chemical contaminants are one of the main hazard factors in food. Pesticide residues, veterinary drug residues, environmental pollutants, harmful chemicals generated during food processing, and some illegal additives are significant potential risks to human health. Therefore, chemical contaminant and residue detection and safety control technologies are of great importance for ensuring food safety and consumer health. This Special Issue aims to promote researchers to share and communicate research progress on chemical residue detection and safety control technologies, such as new analytical methods for chemical pollutants in food, rapid screening or sensing technologies, and hazard reduction or removal technologies. We especially invite authors to submit original research articles or reviews on this topic.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
