

Special Issue

Extraction, Chemistry and Utilization of Active Ingredients from Agri-Food Wastes and Byproducts—Volume II

Message from the Guest Editor

Agri-food wastes and by-products are rich in many (bio)active ingredients. Taking advantage of the principles of circular economy and sustainability, there are numerous emerging new ideas and applications for these wastes/by-products. They include food product innovation, the development of new functional food products, antioxidative and antimicrobial properties, etc. By turning these wastes into high-added-value ingredients, they can also increase the incomes of producers and companies by contributing to new markets and other food-related processing industries. Nevertheless, this Special Issue aims to go a step further. More than identifying new bioactive compounds for direct use in food, we aim to present emerging technologies and ideas for future applications in other fields, and the incorporation and development of new food-based materials for various applications.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
