Food Toxicology and Food Preservation: Risk Evaluation

Message from the Guest Editors

The importance of food toxicology and food preservation has led us to dedicate a Special Issue in the journal *Foods*. Considering food safety risk assessment as the determination of the adverse effects for the health of consumers that may occur as a result of exposure to hazards of food origin, for a good risk analysis, it is necessary to carry out three actions at different levels of action: risk assessment, risk management, and risk communication. Due to new food challenges and the globalization of food and markets, new studies are needed on their safe preservation and risk assessment. Therefore, all those studies that involve actions aimed at identifying, analyzing, and qualitatively and quantitatively assessing the hazards of food origin, derived from exposure of a physical, chemical or microbiological agent related to toxicology, or any measure aimed at preserving the food and avoid its biotic or abiotic contamination, may be published in this Special Issue. Additionally, reviews or scientific works aimed at determining the dangers of food and its risk assessment during its preparation, storage, or conservation have a place in this editorial.

Guest Editors

Dr. Conrado Javier Carrascosa Iruzubieta

Prof. Dr. Arturo Hardisson de la Torre

Prof. Dr. Carmen Rubio

Prof. Dr. Jose Manuel Barat Baviera

Prof. Dr. Raul Grau Meló

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
