Tuber Food: Processing and High-Value Utilization of By-Products

Message from the Guest Editor

Tuber crops like potatoes, sweet potatoes, and yams play a significant role in global food security, but their potential extends far beyond basic nutrition. This Special Issue, "Tuber Food: Processing and High-Value Utilization of By-Products", delves into innovative approaches to enhance the value chain of these vital crops. From cutting-edge processing techniques that improve the nutritional profile and shelf life of tuber-based foods to the sustainable utilization of by-products that often disposed as waste, this Special Issue explores the intersection of food science, technology, and sustainability. By focusing on high-value applications of tuber by-products, we aim to highlight new opportunities for economic growth and environmental stewardship in the tuber industry. Join us as we uncover the transformative possibilities within tuber food processing, turning what was once discarded into valuable resources for a healthier and more sustainable future.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
