Food Safety in Focus: Advancing Allergenicity Risk Assessment Strategies

Message from the Guest Editors

Allergenicity risk assessment (RA) is becoming increasingly relevant to maintaining the rapid pace of food innovation, ensuring food is safe for consumption and does not contribute to the burden of food allergies. However, current strategies for allergenicity RA are based on (outdated) Codex Alimentarius guidelines. In its recent editorial, *EFSA* has highlighted key research and innovation needs related to supporting future regulatory science linked, among other connections, to allergenicity RA. Moreover, recent scientific advances call for the revision of allergenicity RA methodologies to ensure they remain fit for purpose (F4P) and support better-informed decision making. This Special Issue, entitled “Food Safety in Focus: Advancing Allergenicity Risk Assessment Strategies”, invites authors to submit recent research and review articles which introduce the topic at hand, provide an overview of its current status, and share future perspectives.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
