

## Special Issue

# Meat and Meat Products: Processing Technology, Quality Control and Sensory Evaluation

### Message from the Guest Editor

This Special Issue seeks to provide integrated analysis of the major aspects impacting the quality control of meat and meat products including processing technologies and the identification of product origins through the determination of specific biomarkers such as fatty acids, volatile compounds, minerals, or isotope ratios, as well as the specific technologies used for their detection. We welcome submission of original research papers and review articles to address novel quality control technologies that ascertain the origins of foods and guarantee the sensory properties of meat and meat products.

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
