

Special Issue

Quality and Safety of Poultry Meat

Message from the Guest Editors

Poultry meat is one of the most popular meats in the world whose production increased almost 15 times in the last 6 decades, and it is expected to represent 41–45% of all protein from meat sources in 2030. This increased production of poultry meat was accompanied by increased consumer demands for its quality and safety because consumers expect food to not only meet essential nutritional needs but also have a positive impact on their health—to have a functional role. Poultry meat has the potential to be considered as an ideal functional food because its chemical composition and nutritional value can be influenced through production technology. Accordingly, we invite leading scientists working on the quality and safety of poultry meat to submit original research or review papers in this Special Issue of *Foods*. We are interested in all papers that deal with topics including, but not limited to, production technology, rearing systems, genotypes, nutrition, meat processing procedures, and microbiological and hygienic conditions.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
