Special Issue

Individual Differences in Sensory Perception with Implications for Food Choice, Eating Behavior, and Health

Message from the Guest Editor

This Special Issue of *Foods'* Sensory and Consumer Science Section is focused on individual differences in perception driving variability in food-related outcomes, including liking, intake, perceptions, behavior, etc. Researchers in the field of sensory science, food science, nutrition, psychology, neuroscience, and other related, cross-disciplinary fields are encouraged to submit to this Special Issue. We are seeking original research and reviews highlighting new advances in this area that support our understanding of sensory perception and healthy eating.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, Foods has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.
