

Special Issue

Advances in Food Polysaccharides: Characterization, Functionality, Modification, Interactions and Application

Message from the Guest Editors

This Special Issue aims to explore the latest advancements and breakthroughs in the field of food polysaccharides, with a specific focus on their characterization, functionality, modification, interactions, and application. The issue welcomes original research papers and reviews that contribute to expanding our understanding of these significant aspects. The following are some of the specific topics that this Special Issue could cover:

- Innovative techniques and methods for characterizing polysaccharide structures, properties, and functionalities.
- Modification of polysaccharides through chemical, enzymatic, or physical means to enhance their performance in food systems.
- Interactions between food polysaccharides and other food components, including proteins, lipids, and flavour compounds.
- Application of food polysaccharides in diverse food systems, including their role in texture modification, emulsion stabilization, encapsulation, film-forming, and sensory attributes.
- Potential health benefits and bioactive properties of food polysaccharides.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
