New Strategies to Improve the Quality and Safety of Seafoods and the Efficient Utilization of Their By-Products

Message from the Guest Editors

With the continuous improvement of people's living standards, the demand for seafood continues to grow. However, problems such as uneven quality of seafood, safety hazards, and massive waste of by-products are becoming more and more prominent. Improving the quality and safety of seafood is not only related to the health of consumers, but also the basis for the sustainable development of the industry. At the same time, effective utilization of seafood by-products can reduce the waste of resources, create new economic value, and realize environmentally friendly development. Innovative processing technologies and methods to improve the quality of seafood and ensure its compliance with stringent safety standards are important themes. The development of efficient ways of utilizing seafood by-products to enhance resource utilization is also welcome.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
