

Special Issue

Circular Economy Approach to Produce Sustainable and Healthy Foods

Message from the Guest Editors

Circular Economy focuses on implementing production management systems that convert waste into sustainable resources. Some strategies based on the Circular Economy are being implemented worldwide in response to the need for post-pandemic economic growth, aiming at the sustainable development of productive processes linked to the agro-food sector. The loop of nutrients and bioactive compounds offers innovative and sustainable solutions for recovering various value-added components from food processing by-products with reported health-related properties and application opportunities in several industry sectors. This Special Issue is part of the actions of the Project “Ibero-American Innovation Network for the Sustainability of the Plant Food Value Chain” – Ibero Circular (CYTED Network 323RT0142). Original and review papers covering all aspects of the Circular Economy, such as food production and reuse, waste management, by-product utilization and valorization, and nutrient and bioactive compounds recycling, linked to the agro-food sector, are welcome.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2026).
