Antimicrobial Strategies in Food Processing, Production and Storage

Message from the Guest Editor

Ensuring the safety and quality of food products is a critical priority in the global food supply chain. The rise in antimicrobial resistance, along with consumers increasingly preferring minimally processed and sustainable foods, underscores the need for innovative and effective antimicrobial strategies. This Special Issue, entitled “Antimicrobial Strategies in Food Processing, Production and Storage”, explores advancements in combating microbial contamination across various stages of food production. In addition, this Special Issue will compile cutting-edge research on natural and synthetic antimicrobial agents, novel packaging technologies, and process interventions, with its scope including the application of nanotechnology, bio-based antimicrobials, hurdle technology, and predictive microbiology models to control pathogens and spoilage microorganisms.

Guest Editor

Dr. Sang-Soon Kim

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
