

## Special Issue

# Functional Properties and Health Benefits of Bioactive Substances in Plant Foods

### Message from the Guest Editor

The efficiency of Bioactive compounds (BCs) can be affected by several factors, highlighting the important influence of the intestinal microbiota (IM) on the absorption and metabolism of BCs. Also, diet is one of the most important regulators of IM since changes in dietary composition can enhance or inhibit the reproduction of some microbial species, which can have defensive or damaging effects. In addition, IM can synthesize and release a variety of metabolites that are absorbed and transferred into the circulating system, regulate the composition and function of the host's IM, and play important roles in the development and progression of some pathologies.

The primary objective of this Special Issue is to shed light on the existing evidence concerning the numerous potential benefits of consuming plants. We will foreground *in vivo* studies and epidemiological research, as well as investigations into the bioavailability and bioaccessibility of these compounds. Additionally, we will explore how plant compounds can be used to enhance the nutritional and health-related properties of various food products.

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

---

### Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
