Novel Approaches for Developing and Characterizing Value-Added Applications of Food and Agricultural Byproducts

Message from the Guest Editors

Food and agricultural byproducts are renewable organic materials generated from agricultural and food production. They are mixtures of chemicals with an extremely complex matrix containing varying proportions of chemical constituents, including polysaccharide, protein, fat, lignin, and small molecules such as phenolic compounds. Without proper treatments, these food and agricultural byproducts can impose a tremendous environmental burden on ecosystems, representing unsolved hurdles. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Developing innovative technology to process food and agricultural byproducts;
- Bioprocessing and biorefinery of upgrading food and agricultural byproducts to value-added products;
- Improving the nutritional value and health benefits of food and agricultural byproducts;
- Application of foods and agricultural byproducts for cost reduction and sustainability purposes;
- Investigating the economic and ecological feasibility of byproduct conversion processes.

Guest Editors

Prof. Dr. Wenjun Wang

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
