

## Special Issue

# Application of Bioprotective Strains in Food

### Message from the Guest Editors

The application of bioprotective strains to improve the safety and stability of food and beverages is currently of great interest. Interesting research on biocontrol in the production of meat and dairy products and, to a lesser extent, in the manufacture of agricultural commodities is being undertaken. The growing increase in the food-consumption-induced transmission of pathogenic microorganisms through the food chain and the efforts to avoid the use of chemical compounds in food supports the need for research into alternative methods of preservation in this type of food. Different types of microorganisms, such as bacteria, yeasts, and moulds, produce compounds that control the growth of pathogenic microorganisms. Microorganisms and substances that can be used in biocontrol are of great importance, especially regarding their identification, activity, production conditions, antimicrobial mechanisms, and food application.

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
