# Novel Approaches in Food Preservation and Their Impact on the Food System

### Message from the Guest Editors

As of the special issue "Novel approaches in food preservation and their impact on the food system" in *Foods*, I would like to invite to contribute with an article or review paper focused on recent studies on the development of emerging sustainable solutions for food storage and their impact on the food system, thus contributing to more sustainable food value chains and limiting food waste. In this contest, bio-preservatives, active packaging together with eco-friendly and non-thermal technologies are of great interest. For more details, please check its website at: <https://www.mdpi.com/si/95719>

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.
