The Authentication of Food and Beverages Products: Where We Stand

Message from the Guest Editors

The food market is currently a global market, with food being exchanged all around the world. The result of these worldwide food exchanges are the growing consumers' concerns with food authenticity. Although several regulations have been imposed to control such products, the number of fraudulent practices is increasing, with high repercussions for the good name of such food products. The development of technological approaches to control such products has been arising, allowing to control the two dimensions concerned in a robust authenticity system: geographical provenance and species/varietal/breed composition. Hence, in this Special Issue, we invite authors to submit cutting-edge research papers or reviews on the application of technological approaches (OMICs; chemical; etc.) suitable to characterize one or both dimensions of a food/beverage authenticity scheme. This Special Issue also aims to give a defined perspective as to where we stand in terms of technological approach to set the basis to implement an authenticity scheme for a given food/beverage product.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
