

Special Issue

Biogenic Amines and Food Safety

Message from the Guest Editors

The purpose of this Special Issue, “Biogenic amines and food safety,” is to focus on biological, technological and environmental factors affecting the occurrence of biogenic amines (BA) in foods

from animal and vegetable origin. The presence of biogenic amines in foods is quite frequent and inevitable; they are naturally present or also deriving from the decarboxylation of amino acids by enzymes of microbial origin, or even produced by transamination of aldehydes by amino acid transaminase. The Special Issue will discuss on two aspects: 1) BA as quality index of processes and of raw materials, intermediates and end products; 2) the risk of creating toxic reactions associate to BA, considering the composition of the whole meal and specific physiological conditions of the consumer too. The knowledge of the biogenic amine levels in foods is important to both consumers and producers, so will also be discussed on possibility to establish a regulatory system as food safety criteria for BA, as already existing for histamine in fishery products.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
