Enterococci and Their Multiple Roles in Food and Beverage Systems

Message from the Guest Editor

The roles enterococci play in foods, beverages, and their environments have not yet been fully clarified. While several papers demonstrate their importance in flavor formation and even in the typicality of certain traditional, artisanal foods and beverages, their potentialities as probiotics and even as starter cultures, other researchers raise concerns around their safety status, demonstrating their role as potential reservoirs of virulence and antibiotic resistance genes, as well as describing cases in which they acted as opportunistic pathogens/nosocomial agents. Their significance as commensals of the human (and animal) gastrointestinal tract also remains to be detailed. The multiple facets of this genus have, therefore, been the subject of a considerable number of publications in the recent past, but a clear view of their interactions with humans, their foods, and their health is necessary to add new knowledge, systematize the existing information, and serve as a basis for decision making both at the technological and regulatory levels.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
