Extraction Strategies to Recover Bioactive Compounds, Incorporation into Food and Health Benefits

Message from the Guest Editors

The general purpose of this Special Issue, "Extraction Strategies to Recover Bioactive Compounds, Incorporation into Food, and Health Benefits", is to expand the information on bioactive compounds when applied to the food industry. Therefore, the objectives are: To address new ways to extract bioactive compounds (phytochemicals, proteins, peptides, fatty acids, etc.) from raw material in a sustainable way and using food grade conditions, to incorporate these bioactive compounds into the food matrix, and to evaluate their health benefits. This Special Issue will discuss ways to recover different bioactive types and to incorporate them into the food matrix. Moreover, the health benefit has to be supported in the food. Furthermore, the valorization of agri-food waste is a challenge and obtaining bio-based products based on bioactive compounds is a plausible way. We are particularly interested in studies focusing on the extraction of bioactive compounds, including antioxidants, from agri-food residues and guided at the study of their health benefits and functional food applications.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
