# Flavour Research in Food Fermentations

### Message from the Guest Editor

There is a huge diversity in fermented food products around the world, especially those that are the result of spontaneous fermentations—that is to say, processes in which no starter is added and the natural microbiota present in raw materials is responsible for carrying out the fermentation process. Other fermented products, such as the majority of wine, beer or bread, are the outcome of industrialised processes, in which the inoculation of defined microorganisms assures homogeneity and success of the fermentation. Flavour is one of the most relevant factors in the quality of fermented food products. This sensory attribute is the result of the combination of aroma and taste. Aroma refers to odours sensed by nose receptors, whereas taste is the sensation of saltiness, sweetness, sourness, bitterness and umami (savouriness). The flavour development in fermented products is a trending topic, and more research has to be done in this sense to unravel the mechanisms, either chemical or microbiological, for its development.

### Guest Editor

Dr. Amparo Gamero

Department of Preventive Medicine and Public Health, Food Science, Toxicology and Forensic Medicine, University of Valencia, Burjassot, 46100 Valencia, Spain

### Deadline for manuscript submissions

closed (31 January 2022)

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

---

### Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
