Food Origin Analysis with Isotope Fingerprints

Message from the Guest Editors

The control of the geographic origin of food has become of increasing importance, as consumers prefer regionality, high quality, sustainability, a small(er) carbon footprint, short distances, animal welfare, support of local farmers and national/regional economy, and many more claims connected to food of regional production. In many countries, food of national and regional production is preferred to food coming from abroad, albeit with some exceptions. Also, countries aim to increase consumer awareness with respect to regional production, as this strengthens regional economy and agriculture, and an increase in demand usually leads to a higher price that the consumer is willing to pay with respect to competing products from abroad. In the proposed Special Issue, contributions on state-of-the-art methodology and new research on stable isotope analysis and additional techniques for the control and determination of geographic origin are welcome. Research articles and review articles as well as short communications are invited.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
