

Special Issue

Micro and Nanoplastic in Food-Sources, Detection and Its Impact on Human Health

Message from the Guest Editors

Microplastics (MPs particles < 5 mm) are ubiquitous in ecosystems and recently nanoplastics (NPs particles 0.001–0.1 μm) as well. In the last decade, they are a big concern for all humanity. These tiny plastics vary in size, shape, specific density, and chemical composition. A growing concern is linked to the presence of plastics in the seawater and in the soil from where it gradually infiltrates the food chain, reaches our tables, and then into the human body. At the moment information on the presence of those contaminants in food is scarce, so the purpose of this special issue is to make a general examination of the presence of micro and nanoplastics in food with particular reference to the possibility of carrying toxic substances and provide insights into the potential strategies to assess future ecological risk and food safety related to microplastics.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
