Novel Spectroscopy Technologies in Food: Towards On-Site (Value-Chain/Industry) Applications

Message from the Guest Editors

For many years, food spectroscopic methods and applications have been the subject of numerous research studies, but the corresponding actual innovations are still not significant in the food industry. In this Special Issue, we expect original and “breaking” papers, dealing with near-to-industry applications, and based on various possible technological solutions, such as:

Spectroscopy and hyperspectral imaging VIS/NIR (=VNIR)—SWIR, LWIR, MWIR; fluorescence spectroscopy; NMR and MRI on-line; X-ray on-line; LIBS = laser induced breakdown spectroscopy; Tera-Hertz spectroscopy and imaging; advanced applications and methods in chemometrics; big data applications, and any other which is relevant to this description.

The applications may deal with foods of plant origin (fruits, greens, cereals, oils, powders, bakery, etc.), animal products (meat, dairy, eggs, fish, etc.). The aim is to include high-quality contributions which enhance and demonstrate the development of instrumentation, based on the above listed, or any other spectroscopic technologies, and which show potential for their use in the industry.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
