

Special Issue

Sensory Evaluation for the Fruit Quality: Latest Advances and Prospects

Message from the Guest Editors

Fruit quality and its acceptability by consumers depend on various factors associated with the characteristics of the fruit, as well as its conditions of production, storage, and marketing. Among the various properties that determine quality, sensorial aspects require particular attention because they are what decides acceptability. Fruit sensory quality comprises several attributes or characteristics included in appearance, texture, and taste and odor or aroma, all of them particularly important in terms of consumer satisfaction, determining both first purchase and repeated purchases. Sensory science deals with the measurement, interpretation, and comprehension of human responses to product properties as perceived by the senses.

This Special Issue will focus on the latest advances and prospects of sensory evaluations on fruit quality, such as sensory attributes, sensory quality control, sensory analysis to PDO products, qualitative research methods, consumer test methods and questionnaires, shelf-life testing, impact on fruit quality of pre- and postharvest treatments and technologies, as well as statistical analyses, and strategic sensory research.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
