The Generation and Control of Harmful Products in Food Processing

Message from the Guest Editor

In order to obtain satisfactory quality, food materials are usually processed. However, along with the improvement of food quality, harmful products may also be generated, such as heterocyclic amines, advanced glycation end products, acrylamide, ethyl carbamate, methylimidazole, etc. Recently, studies in this area have become much more popular, particularly studies on the generation of these harmful products, the existence of these products in different food systems, and the inhibition of these products by various techniques. Based on the increasing concern about the safety on food processing procedures, it would be interesting to report the latest research on the generation and control of harmful products during food processing.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
