

Special Issue

Recent Advances in Geographical Traceability of Food Products

Message from the Guest Editors

The certification of the authenticity of a product is of great relevance both for farmers, who may eventually benefit from an economic point of view, and for consumers who may ask for even more detailed information about food. Assessing the authenticity of food and its geographical origin is a challenging issue, especially if the authenticity is evaluated based on objective parameters that overcome subjectivity and paper-based certifications. Consequently, technical approaches are becoming more and more complex. In this context, technical improvements are visible in many research fields, which have led to new opportunities in holistic approaches to geographical traceability and authenticity of food products. The main aim of this Special Issue is to focus on the latest works concerning the methodological and technological approaches in geographical traceability of food products. We encourage the submission of state-of-the-art papers to be published, including original research, communications and review articles, highlighting recent advances in food traceability, and related aspects, using different analytical techniques, which represent the challenges of research in this field.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
