

## Special Issue

# Green Extraction Processes for Obtaining Bioactive Substances for Food Processing

### Message from the Guest Editors

Today, eating habits worldwide are focused on acquiring health benefits from the food that is being ingested. In this scenario, bioactive compounds are being requested for food processing. Bioactive compounds may be obtained from fresh raw material or recovered from agro-residues. In either case, extraction is one of the processing steps for producing these bioactives.

Therefore, several available extraction methods can be used; nonetheless, people are also seeking processes based on green technology and an improvement in eating habits. This situation is an opportunity for food researchers, industries, and related areas to further understand and develop green extraction techniques.

“Green Extraction Processes for Obtaining Bioactive Substances for Food Processing” is dedicated to discussing all aspects relevant to the focus of this Special Issue as reflected by the title. We are inviting authors to submit their survey or review papers, research articles, accounts of their theoretical and modeling studies, and short opinion articles. Prof. Dr. M. Angela A. Meireles

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
