

Special Issue

Meat Quality and Health

Message from the Guest Editors

Meat plays an important role in the daily diet of a large proportion of our societies and is considered as a valuable food from a nutritional perspective. Meat contains a great deal of nutrients, including protein, fats, vitamins, and minerals, which are required for human metabolism. The nutritional value of meat is one of the main drivers of consumer meat purchasing decision. However, meat consumption patterns are continuously evolving in our societies, shifting preferences and consumer purchase behavior. Perceptions of meat must be positive in order for consumers to willingly purchase and consume a particular meat product. In this context, beside the price, meat quality and health are key aspects in the acceptance of meat products. Hence, considerable attention has been placed on both, leading to new opportunities that address consumer needs and desires. Specifically, this Special Issue focuses on novel strategies that affect meat quality and influence functional or healthy properties of meat, including but not limited to, natural antioxidants and antimicrobial compounds, essential oils, fatty acids, prebiotics and probiotics compounds

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
