

Special Issue

Novel Foods, Food-Grade Materials, and Environmentally Friendly Compounds from Food Waste

Message from the Guest Editors

The industrial processing of food generates residues causing environmental and economic issues. This Special Issue focuses on deeper research to comprehend what are the best conditions to reuse food by-products in activities directed at the formulation, processing, preservation and packaging of foodstuffs. The Editors are also interested in any contribution on methods for evaluating the costs and environmental benefits of food waste reduction. Any contribution on market research aimed toward understanding the market potential for new sustainable products and how to possibly enhance them will be appreciated.

Food waste recovery meets multiple purposes as it takes advantage of food's interesting chemical and physical properties. For this reason, food by-products can be a source of major compounds in biorefinery industry, or also be successfully employed to obtain "healthier" cosmetics, drugs with natural excipients, or they could be useful in sectors such as environmental remediation.

Finally, we expect that the authors will be able to deepen the field by adding their knowledge and expertise via original research, projects and support.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
