# Food Safety and Foodborne Pathogen—a Global Perspective on Diversity, Combating Multidrug Resistance and Management

### Message from the Guest Editor

The emergence and spread of antimicrobial resistance among foodborne pathogens have become one of the major public health problems worldwide. A recent report of the World Health Organization indicated that the magnitude of antimicrobial resistance has reached alarming levels in many parts of the world. Generally, it is believed that the global and massive use of antibiotics enhances the emergence and dissemination of antimicrobial resistance not only among human and animal pathogens but also among environmental microbial species. Once the emergence of a novel type of antimicrobial resistance occurs in any part of the world, it will soon be disseminated worldwide, posing a global health concern. It becomes clear that the fight against the emergence and spread of antibiotic resistance requires a global response. Therefore, we invite authors worldwide to submit their research articles or comprehensive review papers on the antimicrobial prevalence, mechanisms of antibiotic action, and resistance, as well as technological developments in antimicrobial surface coatings.

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

---

### Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA

2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
